History of the Rochester & Pittsburgh Coal Company

In operation for more than 100 years, the Rochester & Pittsburgh Coal Company (R&P) became one of the largest employers in Indiana County, Pennsylvania. The parent company of R&P was founded by Walston H. Brown as the Rochester & Pittsburgh Coal & Iron Company (R&PC&IC), which was incorporated in November 1881 after Franklin Platt and his brother W. G. Platt, geologists from the Second Pennsylvania Geological Survey, mapped and determined the extent of the coal fields in Pennsylvania. The company would eventually own many coal mining operations. The company began to develop, purchase land, and plan the layout of mines in 1882. In 1883, R&P started to mine and sell bituminous coal commercially. On July 1, 1883, the company’s first railroad, the Buffalo, Rochester & Pittsburgh Railroad, reached Buffalo, New York and the company made its first coal shipment. Company records indicate that the first company mines were the Beechtree and Walston Mines in Jefferson County. In 1884, R&P built company housing for miners near Beechtree Mines at a cost of $250 per house, and the houses were rented to the miners’ families for $60 per year. The Walston Mines were known for making coal coke for the steel industry.

In 1885, despite initial prosperity and success, the railroad company went into receivership, and its property and the stock of R&P were purchased by Adrian Georg Iselin, Sr. (1818-1905), a Swiss investment banker from New York City. The Iselin family remained involved in the company business, and Franklin Platt was elected company president in 1886. Over the next 10 years, R&P amassed large tracks of land to develop as mines to meet the nation’s growing demand for coal. New mining operations opened in Armstrong, Jefferson, Clearfield, and Indiana counties. Adrian G. Iselin, Jr. (1846-1925) was responsible for the expansion of the company into Indiana County. Ernest Iselin, son of Adrian G. Iselin, Jr., was director of the company from 1924 to 1934 and chairman of the board from 1936 to 1954. The company's first mines were located in Jefferson County, Pennsylvania, in an area known as the Saw Mill Run Valley. These mines, including the Walston Mine which, by 1885, was using much of the coal it produced to make coke, boasted the longest string of coke ovens in the world. More than 500 employees worked in the ovens alone. R&P became one of the largest employees in the area.

During the 1880s, with the backing of the Iselin banking firm, R&P expanded significantly, with large operations opened at Beachtree, Walston, Adrian, Florence, and Eleanora. By 1890, the company had acquired over five thousand acres of coal lands. The Company had also purchased several small railroads, which they consolidated into one large railway company, the Buffalo, Rochester & Pittsburgh (BR&P) Railroad.

Coal and coke shipped from the R&P mines found a ready market in the developing iron and steel industry adjacent to the Great Lakes area. The BR&P Railway, which connected the rich coal fields of southwestern Pennsylvania with Buffalo, Rochester, and other more distant markets in New England and Canada, afforded the shortest rail route, and consequently the cheapest route, to these markets.

In addition to the development of its own mines, the Rochester & Pittsburgh Coal & Iron
Company actively pursued the acquisition of older mines with established output levels. Along with the Jefferson & Clearfield Coal & Iron Company, a company with an identical Board of Directors, R&P purchased the Helvetia mine in Clearfield County at the price of $1.1 million, an exorbitant sum in 1895. But for that price, in an average year Helvetia produced 252,142 tons of coal and 9,331 tons of coke. R&P also acquired the Bell, Lewis & Yates Mining Company in 1896, a purchase which included the rights to the Rochester Mine, an operating mine near Dubois in Clearfield County which dated back to 1877. The Rochester Mine produced an average of 504,720 tons of coal per year and employed six hundred miners. At almost the same time, R&P added the Big Soldier Mine near Reynoldsville, Jefferson County, to its holdings. With these new property acquisitions, R&P became one of the largest mining companies in the bituminous coal regions in southwestern Pennsylvania.

As the 19th century drew to a close, R&P continued to expand its existing operations, all the while seeking new coal lands and more lucrative markets for the coal it was producing. Lucius Waterman Robinson became president of R&P in 1899, and he remained company president for the next 20 years. He purchased large tracks of land in White Township and Blacklick Township in Indiana County. By obtaining track rights between Indiana and Pittsburgh over the B&O rails, R&P expanded the BR&P's area of operations, capitalizing on the growing Pittsburgh iron and steel industries. In 1899, plans were under way to move the company headquarters from Jefferson County to Indiana County. In 1900, electricity and electric haulage systems were installed in company mines at Walston, Florence, Adrian, London, Sykesville, Trout Run, Eleanor, and Helvetia. In 1907, the electric haulage system used at the Yatesboro Mines was considered by mining engineers to be the highpoint of modern technology.

In April 1900, R&P purchased several thousand acres of land in the north-western section of Indiana County. For the opening of these coal fields, R&P retained its president, Lucius Waterman Robinson, and its Board of Directors, and formed a complex system of subsidiary companies to head each of its new mines. This was done to protect the parent company from potential bankruptcy and to insure that all income tax advantages were exploited. The Iselin family continued its financial backing for all of the company's business ventures. In 1901-1902, business operations for R&P Coal & Iron were moved to Indiana, Pennsylvania. In 1902, the company purchased 40,000 acres in Indiana County, which Iselin were parceled out subsidiary companies such as Consolidated Coal and Iron, Indiana Coal Company, R&P Coal and Iron, and the Jefferson and Clearfield Coal and Iron Company. The R&P building on Church Street in Indiana was built in 1919.

By 1920, R&P had 15 mines operating in Indiana County alone, the largest of which was Ernest, which employed 1,000 men. This company-owned town epitomized the "mining patches" of southwestern Pennsylvania, with over a dozen different nationalities residing there. These immigrant miners and their families attended the company-built churches, schools, and community centers, bought their groceries in the company-owned stores, and lived in company-owned housing.

Overproduction, price wars, and competition from alternate fuels during and after World War I all contributed to a serious decline in coal company profits during the 1920s. By 1922, in an effort to recoup some of their losses, many coal operators attempted to reduce the union wage
scale. Since 70% of all coal mined in the U.S. was mined under union wage agreements, this resulted in a series of nationwide strikes. By 1925, the center of the bituminous coal industry had shifted from Pennsylvania to Kentucky and West Virginia. As a result, many of R&P's mines were in operation for only one or two days a month. Company town residents searched for work on local farms, trading labor for food. Company executives gave up vacations and worked for periods of time without pay.

On November 23, 1927, the Rochester & Pittsburgh Coal Company was incorporated after the consolidation of the Rochester & Pittsburgh Coal & Iron Company (R&PC&I) and the Jefferson & Clearfield Coal & Iron Company (J&CC&I). R&P entered the 1930s faced with the same economic problems which plagued the entire coal industry during the Depression years. A lack of uniform wage standards created still more difficulties in the coal industry, and by 1932, bituminous coal production in the U.S. fell to 305 million tons, the lowest rate since 1904.

As the economy gradually improved in the late 1930s, the coal industry showed signs of recovery. With World War II on the horizon, the demand for coal increased. By 1939, R&P was producing 395 million tons of coal, which escalated to 514 million tons in 1941. This increase in production combined with the potential loss of employees to the armed forces forced R&P to modernize. R&P responded by installing updated mechanical loading equipment in all company mines. After World War II, bituminous coal production in the United States hit an all-time high of 631,000,000 tons in 1947. In 1948, Dr. Charles Jackson Potter began his 22-year tenure as president of the Rochester & Pittsburgh Coal Company. In order to retain their portion of the market, R&P began to seek new coal fields as older operations were mined out. Several new mines were leased from other Indiana County operators, and R&P placed a new emphasis on surface mining.

By the late 1940s, many Indiana County mines including those of the R&P Coal Company were nearly exhausted, although large quantities of coal were now obtained through strip mining. Underground mining continued for a while in the Company’s towns. The first of McIntyre’s two mines closed in 1952, and the second one in 1963. It was clearly becoming obvious that strip mining was more profitable than mining underground. Because surface or strip mining no longer required company housing, in 1947 the 17 remaining towns including McIntyre, and their water rights, were sold by the Rochester & Pittsburgh Coal Company to the Kovalchick Company in Indiana, Pennsylvania, for $890,000. The names of the 17 company towns, located in Indiana, Armstrong, Clearfield, and Cambria counties were: McIntyre, Coal Run, Iselin, Waterman, Lucernmines, Aultman, Ernest, Tidesdale, Coy, Luciusboro, Fulton Run, Nu Mine, Yatesboro, Margaret, Helvetia, Twin Rocks, and Yatesboro.

Post-War coal production rates continued to climb. In order to retain their portion of the market, R&P began to seek new coal fields as older operations were mined out. Several new mines were leased from other Indiana County operators, and R&P placed a new emphasis on surface mining. R&P also expanded a significant portion of its operations into West Virginia, where the company acquired the coal rights to 7500 acres of land. By 1955, production at O'Donnell, their largest West Virginia operation, had reached 998,728 tons annually.

During the 1950s, R&P struggled to offset the losses of another major slump in the coal industry
due to competition from non-union fields and alternate fuels. In 1954, the company joined with
the Vitro Corporation of America to form the Vitro Mineral Corporation. For several years, Vitro
Minerals mined uranium, silver, feldspar, and titanium at sites as far away as Canada, French
Guiana, Columbia and Alaska. Although these efforts to attain profits outside of the coal industry
were moderately successful, the Vitro Minerals Corporation was dissolved in 1962 and R&P
again concentrated on the coal fields of Indiana County.

The same year that Vitro Minerals was dissolved, Pennsylvania Electric Company (Penelec), a
major consumer of coal, announced a plan to build the Keystone Steam Electric Generating
Station. As railroad freight rates per ton of coal exceeded the market price of coal at the mine
itself, utility companies sought alternatives that would reduce their costs. Based on the theory
that it was cheaper to produce power near its fuel source and transmit the electricity to the point
of usage than it was to ship the fuel to a power plant away from the fuel source, Penelec planned
to build this station near the abundant coal fields of central Pennsylvania. Penelec officials
approached R&P to determine whether there were sufficient coal reserves to fuel such a large
facility. By mid-1964, R&P and Penelec had reached a coal supply agreement for this Station,
and several new mines were under development by R&P to reach the terms of this agreement.
By 1969, a second plant similar to Keystone had been constructed near Homer City, PA, which
was also fueled by R&P coal.

Despite these two mine-mouth stations, which at least locally created a demand for coal, the
1960s were bleak days for the coal industry everywhere. R&P was forced to close many of its
West Virginia operations, and the future of the Company depended upon the success of these
mine-mouth operations.

Entering the 1970s, R&P had successfully altered its fundamental business strategy from that of
selling coal on the commercial market to that of selling virtually its entire production under long-
term contracts to only two customers, the Keystone and Homer City generating plants.
Throughout the decade, R&P remained profitable in a difficult market marked by economic
uncertainty and governmental regulation. It became a Fortune 500 company and the largest
employer in Indiana County.

In 1981, R&P celebrated its centennial, commemorating 100 years of continuous coal production
with the publication of *Rochester & Pittsburgh Coal Company: The First One Hundred Years*
by Eileen Mountjoy. Financial control of the company remained in the Iselin family from 1885
until R&P was acquired by CONSOL Energy, the family remained actively involved as officers
of R&P's Board of Directors. In 1998, the Rochester & Pittsburgh Coal Company was bought
by CONSOL and incorporated into CONSOL Energy, Inc. (NYSE: CNX).

The Rochester & Pittsburgh Coal Company records were donated to the Special Collections &
University Archives at Indiana University of Pennsylvania, and the collection continues to serve
as a valuable resource to researchers and historians. In 2009, the University Museum hosted the
exhibition *A Walk Through Time: Pennsylvania Coal Culture featuring the Rochester &
Pittsburgh Coal Company Collection.*

**Scope and Content Note**
The Rochester & Pittsburgh Coal Company records constitute one of the most complete collections of coal company records in existence. They are housed in one hundred and two archival boxes and are arranged in five series. Series have been designated for the presidents' office files, the Board of Director's files, Vitro Minerals Corporation files, real estate transaction files, and company ledgers. The president’s office files are further divided into five subseries, one for the early materials, and one for each administration between 1920 and 1978. These records primarily include daily correspondence, financial information, shareholders and Board of Directors reports and meeting notices, deeds and land acquisition files, as well as material pertaining to the United Mine Workers of America. These records are fairly comprehensive for the span of dates contained, particularly with regard to R&P's early years of operation and the company's later involvement in the Vitro Minerals Corporation. A significant amount of material relating to the operation of the Buffalo, Rochester & Pittsburgh Railroad is also interwoven throughout the collection.

For more information about photographs and oral history interviews related to R&P, please see Manuscript Group 94: Rochester & Pittsburgh Coal Company Media Collection.

**Series I: President's Office Correspondence and Files (Boxes 1-80)**
The correspondence files of six of R&P's presidents represent the most significant portion of materials in the collection. These files are arranged chronologically, with deference given to their original order. This correspondence documents not only the history of the present company, but also the incorporation and dissolution of its many predecessor and subsidiary companies.

**Subseries A: Early Correspondence (Boxes 1-3)**
The earliest correspondence in this subseries consists largely of communication between mine superintendents and company executives. These letters provide information on tonnages produced by the mines and coke ovens, construction of additional mining operations and the acquisition of coal lands and mineral rights.

This subseries also includes the papers of Lucius Waterman Robinson, whose involvement with the company dates from 1898 to 1919. Waterman's papers include daily reports to the A. Iselin & Company which describe in detail the company's methods of procuring immigrant labor and how the company dealt with early strikes and labor-management conflict.

The letters and memos between the A. Iselin & Company and the Jefferson & Clearfield Coal & Iron Company, which date from 1896 to 1916, depict the management's view of the effects of World War I on the nation's coal industry in general and on the Jefferson & Clearfield Coal & Iron Co. in particular. They also provide information on the organization of several subsidiary companies which were formed to operate the company stores in each of R&P's mining towns.

The final section of this subseries contains the records and correspondence of B.M. Clark, who was an executive with the company from 1919-1933. Clark, an attorney by training, came to R&P from the Jefferson & Clearfield Coal & Iron Co. He utilized his knowledge of the law to become R&P's most formidable opponent of the UMWA during the violent
coal strikes of the 1920s and 1930s. Much of his correspondence records his tactics for breaking the union during this period.

**Subseries B: H.S. Clark Files (Boxes 4-19)**

Heath Steck Clark came to the R&P in 1919 as a clerk in the legal department. He moved from position to position until 1928, when he became vice president of R&P. Clark served in this capacity until 1933, when he took over for his father, B.M. Clark, as president of R&P. After retiring from the presidency in 1948, Clark assumed new responsibilities as chairman of R&P's finance committee.

Clark's papers, which date from 1919 to 1956, are unique in their completeness, tracing in detail his thirty-seven year career with R&P. Clark's earliest papers record his activities as assistant solicitor and general solicitor, and are concerned primarily with the company's legal matters, income tax preparations, mortgage transactions, and the incorporation of Jefferson & Clearfield Coal & Iron Company.

As president, Clark was active in many governmental issues relating to the coal industry. His correspondence during these years reflect his involvement in legislation passed in the 1930s and 1940s. R&P's installation of the Joy loading machine, which replaced the pick and shovel, is also well documented.

During these same years, Clark also devoted a great deal of attention to mine safety issues. He became involved in the National Safety Council and the Coal Research Program at Penn State, and as a result his papers from the decade following World War II document many events taking place locally and nationally during this period.

In the latter years of his presidency, Clark made a series of decisions which successfully guided the Rochester & Pittsburgh Coal Company through several financial crises which had bankrupted similar operations. These decisions, which included the purchase of a mine in West Virginia, where coal could be produced for non-union wages, and the sale of the company-owned mining towns due to the increasing cost of their upkeep, are detailed in Clark's files from this time period.

**Subseries C: H.V. Fritchman Papers (Boxes 20-43)**

H. Vernon Fritchman was hired by Heath Clark as R&P's general solicitor in 1936. Prior to working for R&P, Fritchman operated a law practice in Indiana, Pennsylvania. From solicitor, Fritchman ascended to the vice presidency of the company, and in 1970, he became president of R&P for three years.

Fritchman's papers date from 1936 through 1970. His earliest correspondence reflects his handling of the company's legal matters. There is also a considerable amount of materials concerning Fritchman's activities with the War Production Board, which date from 1936-43. His involvement with the Coal Commission District Board, dating from 1939-41, documents contemporary marketing rules and regulations, minimum price scheduling, and the Wage Stabilization Board.
The correspondence files of Fritchman, which date from 1940-1956, record his involvement with the Central Pennsylvania Coal Producers' Association, various wage scale committees, strip mining legislation, and unemployment compensation. These files also include details of the implementation of an updated R&P employee death benefit plan. Some of the additional topics covered by Fritchman's correspondence during his tenure as vice president and general solicitor include the legal transactions inherent to the formation and dissolution of the Vitro Minerals Corporation, Ltd., coal contract negotiations, and the organization of the Luzerne Coke Company.

Subseries D: C.J. Potter Files (Boxes 44-74)
Dr. Charles Jackson Potter (July 16, 1908-June 10, 1990) joined R&P as vice president of operations in 1938. He was named company president and director in 1948, and moved to Chairman of the Board in 1970, a position he held until his retirement from R&P in 1988. He continued to serve as a member of the board and participate in company affairs until his death on June 10, 1990. At the time of his death, William Kegel, Potter's successor as chairman of the board, was quoted as saying, "Dr. Potter's contributions both to Indiana and to the coal industry are, in my opinion, without equal."

Charles Potter graduated from the School of Mines of the University of Missouri at Rolla in 1929, and earned his Master’s degree from UM-Rolla in 1930. In 1932, he completed in PhD in Chemical Engineering at West Virginia University. Dr. Potter received an honorary Doctorate of Engineering from the University of Missouri in 1950; and an honorary Doctor of Laws from Indiana University of Pennsylvania in 1982. Learn more at http://web.cemr.wvu.edu/~mrac/mrbdedica/potter_foyer1.html

Dr. Potter's papers in this collection range from 1930 to 1970. The earlier materials reflect his administrative activities and include annual reports, budgets, reports and studies relating to the coal industry. His later correspondence demonstrates Potter's growing interest in cleaning plant improvements, coal gasification and competition from alternative fuels. Scattered among his correspondence are also association files from various organizations to which Potter belonged, including the National Petroleum Council, the West Virginia Coal Association, and the Bituminous Coal Operators Association.

As Chairman of the Board of R&P, Dr. Potter was influential in the development of the Keystone and Homer City mine-mouth electric generating stations. However, there is little material concerning these operations in his correspondence. Negotiations surrounding this part of R&P's activities were conducted by the company's solicitors.

Related materials: In 1989, a series of twelve one hour interviews with Dr. Potter were conducted. These interviews discussed Potter's World War II activities, when he served as deputy solid fuels administrator with the Department of Interior, and his post-war activities, when Potter was sent to Europe to assist in the rehabilitation of the coal mines overseas. Potter also spoke about his negotiations with John L. Lewis, and provide a general overview of Potter's views on the mining industry during his fifty-year involvement. These interviews are available on tape to researchers. (See Collection 83)
Subseries E: G.P. Remey Papers (Boxes 75-80)
Gilbert P. Remey began his career at R&P as an executive trainee around the mines and tipples. He was promoted to salesman for the United Eastern Sales Corporation, at that time a subsidiary of R&P, and then to district manager. At the same time, he was made vice president of sales for R&P. In 1967 he was named president of United Eastern, and in 1973, upon the retirement of Vernon Fritchman, Remey took over the presidency and directorship of R&P.

He served R&P in this capacity until his death in 1978. Remey's papers date from 1973 to 1978. These materials record the formation of the Helvetia Coal Company, an R&P subsidiary under which many of R&P's present mines operate. Remey's papers also chronicle many of the details regarding contracts and negotiations with the Keystone Power Plants, Pennsylvania Electric Company, and the Potomac Electric Power Company.

Series II: Board of Directors Files (Boxes 81-82)
The Board of Directors files are arranged chronologically and contain minutes of board meetings, and quarterly and annual reports. The bulk of these materials date from 1948 to 1961, and, while they are fairly comprehensive for these dates, they provide only a small glimpse of R&P operations.

Series III: Vitro Minerals Corporation Files (Boxes 83-87)
The files of the Vitro Minerals Corporation, which date from 1953 to 1966, are arranged chronologically. These materials provide insight into R&P's partnership with Vitro Minerals and include correspondence, miscellaneous reports, minutes of the Vitro Board of Directors meetings and executive committee meetings, and contract negotiation materials. The records span the entire length of the partnership between R&P and Vitro and are rich in details regarding R&P's ventures in the mining of uranium, silver, tungsten, asbestos and feldspar. Much of the materials contain information regarding Vitro's largest operation, an open-pit uranium mine in Wyoming where Vitro mined and processed uranium that was subsequently sold to the Atomic Energy Commission.

Series IV: Real Estate Transaction Files (Boxes 88-98)
This series, arranged by township and county, consists of records of R&P's acquisition of coal lands and mineral rights in Clearfield, Jefferson, Armstrong, and Indiana counties between 1882 and 1956. Also included are drill sample records, surveys, and articles of agreement, as well as inventories of company-owned properties, maps and blueprints of various mining plants. Of particular interest are materials on the incorporation of the predecessor company's two pig iron furnaces and the construction of several "short-line" railroads used to transport coal from mines located at a distance from the main carrier, the BR&P.

Series V: R&P Canada, Ltd. (Box 99)
This small series contains materials from R&P's Canadian sales operation. In 1926, the Rochester & Pittsburgh Coal Company (Canada) Ltd. was chartered in Montreal. Its principle office was in Toronto, Ontario, with branch offices and docks at Oshawa and Port Colborne,
Bowmanville and Port Stanley.

These records, which date from 1926 to 1950, are organized chronologically and include the minutes of the stockholders and Board of Directors meetings, a World War II report and some photographs of Canadian mining operations.

**Series VI: Ledgers (Boxes 100-102 and Individually Shelved Ledgers, and Boxes 103-108 Microfilm Rolls of original Ledgers)**

The final series of this collection is perhaps the largest series by volume. It is arranged roughly chronologically by subsidiary company and dates from 1881 to 1954. This group of financial ledgers, of which there are nearly eight hundred, document the founding of the company's seventeen mining towns, beginning with the parent company's incorporation in 1881. Included too are the ledgers of several railroads and pig iron furnaces owned by earlier companies, engineering records, records of shipments, and company store ledgers.

**Series I: President's Office Files**

**Subseries A: Early Correspondence**

**Box 1 Early Executive Correspondence, 1886-1932**

1. Letter Book: Adrian Iselin, April 1890-September 1896, 456 pp., Correspondence regarding coal properties of Helvetia Mines
2. Letter Book: S.B. Elliot, January-June 1896, 625 pp., Correspondence, mainly to George H. Lewis, Pres. of Bell Lewis & Yates Coal Mining Company (acquired by Rochester & Pittsburgh Coal & Iron Co. in 1896), Reports on Mines
4. Letter Book: Lucius Waterman Robinson, July-October 1900, 698 pp., Supply Orders, Coal Lands Purchases, Financial Reports, Blacklists, Coke Production, Communications to Superintendents, Railroad Car Shortages
5. Letter Book: Lucius Waterman Robinson, April-June 1901, 1000 pp., Correspondence
6. Letter Book: Executive Correspondence, January 20-April 4, 1902
7. Letter Book: Lucius Waterman Robinson, July-September 1902, 1000 pp., Correspondence with George Clune, Auditor/Treasurer and Adrian Iselin, Jr., V.P. of Buffalo, Rochester & Pittsburgh: Railroad, Views on Labor, Blacklists, Labor Procurement Procedures, Supply Orders
5. Letter Book: Executive Correspondence, November 26, 1902-February 7, 1903
6. Letter Book: Executive Correspondence, February 9, 1903-April 16, 1903
7. Letter Book: Executive Correspondence, June 11, 1906-July 14, 1910
8. Letter Book: Executive Correspondence, September 15, 1910-December 29, 1911
10. Letter Book: Lucius Waterman Robinson, January-July 1918, 501 pp., Correspondence with George Clune, Tonnage Reports, Tax and Financial Matters
11. Letter Book: Executive Correspondence, May 12, 1919-February 10, 1920 (Adrian Iselin and Lucius Waterman Robinson)

Series I: President's Office Files
Subseries A: Early Correspondence
Box 2 Executive Correspondence from A. Iselin & Co. to R&P Coal Co. Executives, 1899-1916
1. Rochester & Pittsburgh Coal & Iron Co. #4, Jul 1899-Feb 1902, 501 pp., Receipts and Financial Data, Statements, Meeting Minutes, Correspondence
5. Mahoning Investment Company #2, Mar 1909-Sept 1910, 391 pp., Correspondence from A. Iselin Company to George Clune, A. Iselin, Jr., George Eaton, and L.W. Robinson
7. Mahoning Investment Company & Coal Co.'s #3, Jul 1912-Apr 1913, 600 pp., Receipts, Profit and Loss Statements, Contracts, Shareholder Lists, Harry Yates/Valley Supply
8. Mahoning Investment Company & Coal Co.'s #4, Apr 1913-Jan 1914, 494 pp., Correspondence between A. Iselin Company and Rochester & Pittsburgh Coal & Iron Company, Routine Business, Financial Data, Organization Information

Series I: President's Office Files
Subseries A: Early Correspondence
Box 2B Correspondence of B.M. Clark, G. Clune, G. Eaton, L.W. Robinson, Executive Correspondence, 1909
1. B.M. Clark, Jan-Feb 1909, Company Mortgages
2. B.M. Clark, Mar-Aug 1909

Series VI: Ledgers
Box 103 A/B Microfilm (Box 103A is not for public use, Box 103B is for public use)
Box 103A (Fireproof Cabinet)
1. Ledgers #1 To #2
2. Ledgers #3 To #4
3. Ledgers #5 To #6
4. Ledgers #7 To #8
5. Ledgers #9 To #10
6. Ledgers #11 To #12
7. Ledgers #13 To #14
8. Ledgers #15 To #16
9. Ledgers #17 To #18
10. Ledgers #19 To #20
11. Ledgers #21 To #22
12. Ledgers #23 To #24
13. Ledgers #25 To #26
14. Ledgers #27 To #28

Series VI: Ledgers
Box 104 A/B Microfilm (Box 104A is not for public use, Box 104B is for public use)
Box 104A (Fireproof Cabinet)
1. Ledgers #29 To #30
2. Ledgers #31 To #32
3. Ledgers #33 To #34
4. Ledgers #35 To #36
5. Ledgers #37 To #38
6. Ledgers #39 To #40
7. Ledgers #41 To #42
8. Ledgers #43 To #44
9. Ledgers #45 To #46

Series VI: Ledgers
Box 105 A/B Microfilm (Box 103A is not for public use, Box 103B is for public use)
1. Ledgers #47 To #48
2. Ledger #49
3. Ledger #50
4. Ledger #51
5. Ledger #52
6. Ledger #53
7. Ledger #54
8. Ledger #55
9. Ledger #56
10. Ledger #57
11. Ledgers #58 To #59

Series VI: Ledgers
Box 106 A/B Microfilm (Box 106A is not for public use, Box 106B is for public use)
1. Ledgers #60 To #61
2. Ledgers #62 To #63
3. Ledgers #64 To #65
4. Ledgers #66 To #67
5. Ledgers #68 To #69
6. Ledgers #70 To #71
7. Ledgers #72 To #73
8. Ledgers #74 To #75
9. Ledgers #76 To #77
10. Ledgers #78 To #79

Series VI: Ledgers
Box 107A Microfilm, Rolls 1-22 (For Public Use)
1. Ledgers #80 To #84
2. Ledgers #85 To #89
3. Ledgers #90 To #94
4. Ledgers #95 To #97, #180 To #181
5. Ledgers #182 To #186
6. Ledgers #186 (Cont'd) To #189, #149 To #150
7. Ledgers #150 (Cont'd) To #157
8. Ledgers #158 To #163
9. Ledgers #164 To #170
10. Ledgers #171 To #176
11. Ledgers #177 To #179, #192 To #194
12. Ledgers #194 (Cont'd) To #195, #206 To #209
13. Ledgers #209 (Cont'd), #215, #196 To #204, #105
14. Ledgers #106 To #108
15. Ledgers #108 (Cont'd) To #110
16. Ledgers #111 To #113
17. Ledgers #113 (Cont'd) To #120
18. Ledgers #121 To #125
19. Ledgers #125 (Cont'd) To #128
20. Ledgers #129 To #133
21. Ledgers #134 To #136
22. Ledgers #137 To #140

Series VI: Ledgers
Box 107B Microfilm, Rolls 23-38 (For Public Use)
23. Ledgers #141 To #143
24. Ledgers #143 (Cont'd) To #148
25. Ledgers #190 To #191, #205, #213 To #214
26. Ledgers #228, #223, #232 To #234, #292, #264
27. Ledgers #265 To #269
28. Ledgers #270 To #274
29. Ledgers #275 To #281
30. Ledgers #282 To #287
31. Ledgers #288 To #291, #298 To #299
32. Ledgers #300 To #306
33. Ledgers #307 To #310
34. Ledgers #310 (Cont'd) To #314
35. Ledgers #314 (Cont'd) To #316
36. Ledgers #317 To #321 (#322 Is Missing)
37. Ledgers #323 To #327
38. Ledgers #327 (Cont'd) To #328, #369

Series VI: Ledgers
Box 108 Microfilm, Rolls 1-38 (Same as Box 107 A/B, Not for Public Use)
Fireproof Cabinet
1. Ledgers #80 To #84
2. Ledgers #85 To #89
3. Ledgers #90 To #94
4. Ledgers #95 To #97, #180 To #181
5. Ledgers #182 To #186
6. Ledgers #186 (Cont'd) To #189, #149 To #150
7. Ledgers #150 (Cont'd) To #157
8. Ledgers #158 To #163
9. Ledgers #164 To #170
10. Ledgers #171 To #176
11. Ledgers #177 To #179, #192 To #194
12. Ledgers #194 (Cont'd) To #195, #206 To #209
13. Ledgers #209 (Cont'd), #215, #196 To #204, #105
14. Ledgers #106 To #108
15. Ledgers #108 (Cont'd) To #110
16. Ledgers #111 To #113
17. Ledgers #113 (Cont'd) To #120
18. Ledgers #121 To #125
19. Ledgers #125 (Cont'd) To #128
20. Ledgers #129 To #133
21. Ledgers #134 To #136
22. Ledgers #137 To #140
23. Ledgers #141 To #143
24. Ledgers #143 (Cont'd) To #148
25. Ledgers #190 To #191, #205, #213 To #214
26. Ledgers #228, #223, #232 To #234, #292, #264
27. Ledgers #265 To #269
28. Ledgers #270 To #274
29. Ledgers #275 To #281
30. Ledgers #282 To #287
31. Ledgers #288 To #291, #298 To #299
32. Ledgers #300 To #306
33. Ledgers #307 To #310
34. Ledgers #310 (Cont'd) To #314
35. Ledgers #314 (Cont'd) To #316
36. Ledgers #317 To #321 (#322 Is Missing)
37. Ledgers #323 To #327
38. Ledgers #327 (Cont'd) To #328, #369
